INTELLIGENT INNOVATION

Introducing the latest innovation in the Grass Valley™ family of Intelligent Digital Disk Recorders (iDDRs)—the **T2™ iDDR**. With superb full high-definition capture and playback, the T2 iDDR is not just a new class of VTR replacement, but an invaluable, market leading tool for the video professional.

The T2 iDDR is a ground breaking design. It combines the functionality of a rugged and reliable VTR, with the advantages of file-based workflows. T2 passed rigorous environmental testing to assure solid on-the-road reliability. The T2 user interface is intuitive, easy to learn, and use. And, while T2 provides solid deck-like performance, it also provides sophisticated automation, play list, and show-control integration tools.

Excelling in many applications, the T2 iDDR's many uses include: events and staging, auditorium, corporate AV centers, education facilities, broadcast display support, and regional sports production.

1 AFFORDABLE QUALITY

The T2 iDDR delivers **full-resolution HD picture quality** at an unbeatable price. Starting at **half the cost** of other devices in its class, the T2 iDDR truly is the most affordable, complete, and self-contained SD and HD audio/video playout center. Offering **simultaneous use of all channels** and featuring **advanced controls, extensive connectivity**, and impressive **file-based content management**, T2 is the clear choice when moving to a tapeless workflow.

2 UNRIVALED CONNECTIVITY

The T2 iDDR rear panel gives you audio/video connectivity at its finest, with a wide range of digital and analog video and audio connections. But T2 also accepts content from file-based video creation applications using, **MPEG-2, QuickTime***, and **Windows Media Video (WMV)** and **HQ AVI** files.

Media files can be imported or exported via removable media using **USB 2.0, FireWire (IEEE 1394)**, and an optional, dedicated 2.5-inch **HDD/SSD** drive bay.

**Not all QuickTime file formats are supported.*

3 EASY-TO-USE INTERFACE

The T2 iDDR features the **industry's largest touchscreen**—seven inches of crisp, clear, high-quality image display and playback. The easy-to-use touchscreen is driven by an advanced **software application suite** for managing and selecting media clips, clip editing, trimming, playlist creation, and playout.

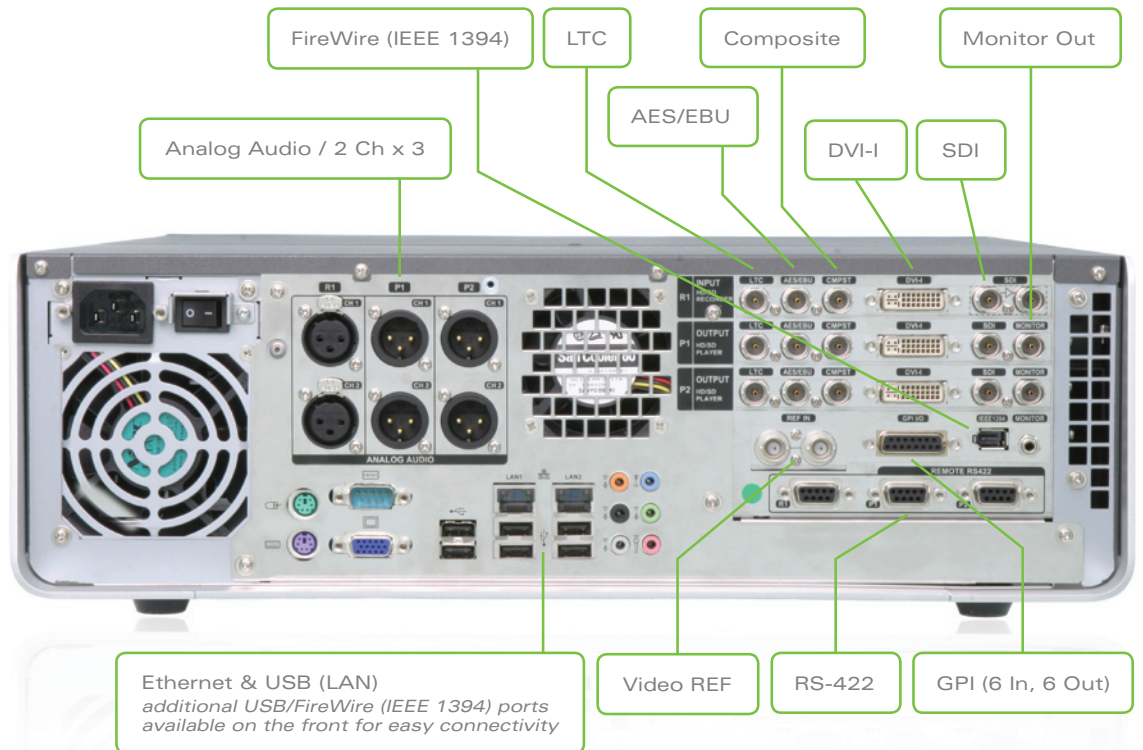

The ergonomically styled front panel **transport controls** have been designed to look and feel very much **like those of traditional VTRs**. Further, the T2 iDDR can be controlled by our **Indigo™ A/V mixer**—which combines features normally found in video production switchers, presentation mixers, and audio mixers—to create a powerful presentation or show control system.

T2 iDDR

THE LEGACY CONTINUES

Grass Valley's more than **fifty years of on-air innovation** continues with full high-definition capture and playback in the T2 iDDR. Its unparalleled features and unprecedented price point have set a new standard and have forever changed user expectations. As pioneers in an ever-evolving industry, it's not enough just to keep up. We have to exceed the demands of A/V professionals every time. T2's quality and ease of use are second to none—from live events and productions to news and broadcast. Step ahead. Take advantage. Learn why the T2 iDDR is the **intelligent** choice.
