

NewTek NDI PTZ Camera

Introducing the remote-controlled camera that delivers live video anywhere on your network, and it's the easiest to setup.

Built-in NDI® allows it to connect over standard computer networks to any of the hundreds of systems, devices, and applications that support NewTek's innovative Network Device Interface technology.

Along with standard HD-SDI and HDMI outputs, it's the first camera to connect video, audio, control, tally, and power with a single network cable.

Ideal for live production, sports and event coverage, video conferencing, town hall meetings, lectures and media communications and more.

The NewTek NDI PTZ Camera is the premier camera solution for today's streamlined production workflows.

At a glance

- **Pristine HD Video**
Deliver broadcast-quality high definition video, with native support for HD resolutions up to 1080p 60 and 20x optical zoom.
- **One-Cable IP Workflow**
Supply power, connect to your network, acquire and transmit video, and operate the camera with a single Ethernet cable.
- **Simultaneous Digital Output**
Optionally integrate with existing baseband equipment, with industry-standard 3G-SDI and HDMI video connections.
- **Remote Control**
Operate using an intuitive web-based user interface that includes controls for pan-tilt-zoom functions, presets, and camera settings.
- **Universal Compatibility**
Works with live production systems from NewTek and other manufacturers, as well as popular software-based video tools and desktop applications.
